

Tranquil Slim Rugged - Intel 7th Gen Mobile vPro - IP51

A tiny foot print, ideal for the most restricted spaces where only the smallest will do!

i5 performance, 4K outputs and remote management (vPro) condensed in a discreet, thin yet strong and fanless enclosure! Designed to sit flush on a wall behind a screen, the Slim Rugged is ideal for large digital signage projects where estate management through vPro is a must. This tiny, yet reliable device is a guarantee to reduce total cost of ownership and to always keep your content visible on the display screen!

Key Features

- Processor: i3 - i5
- Operating Range: -10C to 40C
- Intel vPro
- 1Gbe LAN
- Maintenance free

Key benefits of FANLESS and RUGGED computers

No fans obviously means no noise, but it's not the only benefit!

No fans allow an important decrease in power consumption, making our products more sustainable!

A fanless computer eliminates the risk to draw in dust and dirt from the environment, the cause of potential failures and costly downtime.

The absence of moving parts enable our products to resist shocks and vibrations, for an increased reliability.

They are built to withstand harsh and constrained working conditions.

High Ingress Protection (IP) rating, indication the protection level of products against both solid and liquids in electrical enclosures.

The in-house designed and milled aluminium chassis is optimized for efficient passive cooling and durability. Its conception proved their reliability in extended operating temperatures.

The aluminium used for the chassis production is repurposed and recycled, and the production waste is recycled too!
