**Your IT-Enterprise Solution Factory.**

# GLOBALLY ACTIVE –

Development and production  
of innovative energy-efficient  
IT solutions

Development and production  
of edge computing systems –  
robust and energy-efficient

Energy-efficient data center,  
Leasing and co-location

Manufacturer of customized,  
customer-oriented IT solutions

System Integrator & Solution  
Provider for High-Performance  
Computing (HPC)

Technology partner for media  
and entertainment

# THIS IS BOSTON – THAT’S US.

As a well-established manufacturer and technology driver, Boston stands for the development and creation of innovative, energy-efficient, and resource-saving enterprise IT solutions.

Through its company-wide agility and continuous development, the Boston Group has grown strongly over the last 30 years.

Thanks to our dynamism and flexibility, we are a proven alternative to well-known market competitors in the data center sector, which is reflected in our portfolio. Due to this high demand for quality and performance, we develop customized products at the highest technological level. Long-term relationships with our partners are important to us.

# SOLUTIONS FROM THE EDGE TO THE CLOUD.

Boston Server & Storage Solutions, based near Munich, was founded in April 2010 within the internationally operating Boston Group. In 2019, the DACH region was expanded to include the branch in Kreuzlingen/Switzerland. Another milestone in our company history was the merger with the French Group, 2CRSi, in 2019, a server manufacturer headquartered in Strasbourg, which is listed on the Paris stock exchange Euronext.

**„First to Market“:** As a solution factory and leading OEM manufacturer, we are an innovative solution provider from customized server and storage systems to complex cloud computing solutions using the latest enterprise technologies.

## PROFESSIONALISM WITH SYSTEM

- Compute, HPC and GPU
- AI, Machine Learning, Data Science and Data Analytics
- Virtualization and Cloud Computing
- SAN, NAS, Object Storage
- Security and Video Surveillance
- Energy Efficiency and Sustainable IT
- 21" OCP (Open Compute Project) Solutions
- Efficient Air- and Liquid-Cooling

# YOUR VISION. OUR KNOW-HOW.

With **BOSTON** LABS, our own test and technology center, we support you comprehensively in your projects and ideas:

**Design.** Based on a detailed customer analysis, we coordinate with you to help test your individual workload on the latest configuration and state-of-the-art hardware.

**Testing.** Over 1 million US dollars of hardware and software equipment of the latest technology (technology, often still under NDA) is available for testing with remote access.

**Experts.** Support and targeted advice: Our experts accompany and support your benchmark tests and lead them to success together with you.

## FOR US, SERVICE IS THE WHOLE PACKAGE.

-  • **CONFIGURATION SERVICE**  
"Built to order" solutions customized to your requirements already from quantity ONE!
-  • **PRE-SALES AND CONSULTING**  
Get advice from our team of experts
-  • **QUALITY**  
Every system is subjected to a 24-hour function test before delivery
-  • **INSTALLATION SERVICE**  
Complete cabling and integration as well as commissioning on site, from individual systems to complete data center solutions
-  • **AFTER-SALES SUPPORT**  
Our local team of experts will support you even after the purchase
-  • **SUPPORT SERVICES**  
SLAs from advanced replacement up to 7x24h on site
-  • **GLOBAL LOGISTICS**  
Local and global inventory network, delivery via global logistics partners
-  • **BOSTON TRAINING ACADEMY**  
IT knowledge transfer, boot camps and live demos
-  • **FINANCE**  
Flexible leasing and financing solutions

# 12 REASONS WHY YOU CAN TRUST US.

- IT systems "Made in Germany" with 30 years of corporate expertise
  - Tailor-made, customer-specific IT solutions for the respective requirements
  - On request: individual branding and design
- 
- Reliable, accompanying, and competent advice and consulting services
  - In-house engineering for individual customer solutions
  - Quick and easy access to our Boston team of experts
- 
- Direct, local pre- and post-sales support
  - Boston Labs: test, demo and development labs
  - Boston Training Academy
- 
- International and local logistics concept
  - Worldwide technology partner network
  - Globally operating group of companies with 6 own production sites

Whether you have 1 or 1000+ solutions - your satisfaction matters the most to us.

## OUR PARTNERS ARE ALREADY CONVINCED, HERE'S WHY YOU SHOULD BE TOO.

HPC & AI Edge Solution, Managed Cloud Service for Intelligent production facilities and manufacturing, ONCITE Industrial Edge Appliance for digitalization and automation.

HPC for physical data processes and large storage environment, Large Hadron Collider (LHC), the most powerful particle accelerator in the world, 150PB+ and over 10,000 server Nodes delivered.

Software-defined high-availability storage cluster, video security technology with data transmission and image storage, storage conception implementation and Camera connection.

Customized systems with individual branding Video security technology in Safe city, airports, industry, logistics and casino. Image storage and transmission via intelligent video analysis.

Immersion cooling solution, highly efficient and climate-friendly with 40% energy saving, synthetic fluid developed with Shell, Research for Translational Biodiversity Genomics.

**Fendt tractors**  
HPC GPU Cluster, CFD (Computational Fluid Dynamics) Simulation, efficient calculation of fluid dynamics.
