

UNLOCK THE POWER OF AI

Enterprise Storage Solutions
Your Key to Endless Potential

Storage Brings AI Data to Life

AI is key to accessing the potential of data across a wide scope of businesses – from healthcare to Fintech to scientific research. Despite the seemingly “invisible” nature of the technology behind it, AI takes a lot of storage, computing and hardware to bring data to life. In fact, it is one of the most demanding applications being run by consumers, businesses, and their technology providers to enable high speed decision-making for transformative change.

Whether you are building your own storage system or looking for ready to deploy solutions, Western Digital offers a full range of enterprise grade Ultrastar SSDs and HDDs as well as high-capacity JBOD or JBOF platforms.

HDD

Massive capacity
for Big Data

JBOD

Designed for high density
and flexibility

SSD

High performance for Big
Data enterprise workloads

JBOF

Next generation
high-performance
networked storage
